Compound locations will be posted on compound notice board by May 18.

BSBC COMPOUND GUIDELINES

Rev date 03/09/12

Year-round: (Director of Infrastructure)

1. **Golden Rule: Treat others and their property as you wish to be treated.**
2. Keep the compound neat and tidy. Abide by the posted "BSBC Environmental Guidelines". Dispose of Engine oil, antifreeze and batteries off-site, do not drain onto the ground or leave abandoned in the compound, especially any product(s) that could harm humans, wildlife or the environment. If you make a mess, clean it up and take all trash away with you.
3. Refrain from moving or adjusting anyone else's property without their permission. To assist with this requirement, all property must be clearly identified with owner's name or boat name; this includes masts, trailers, dollies, boats, cradles, boxes, ladders, etc.
4. Storage of miscellaneous material is at the discretion of the Compound Committee.
5. Re-lock the access gates when entering and departing to prevent unauthorized entry.
6. Use shore power ONLY when present, and unplug before leaving. (exceptions include weather station, electric winch, pop & ice machines)
7. Do not stack or step on masts! Exercise extreme care when working near rigging & head-foils of others.
8. Flares, portable fuel tanks, butane, propane, CNG, alcohol or other flammable liquids (acetone, paints, solvents etc) matches and lighters must not be stored onboard or in the compound. The only exceptions are the Sail School fuel locker and BBQ tanks.
9. Ensure standing water does not collect in or on boats, boat-covers etc. to minimize breeding of mosquitoes.
10. Sand blasting, spray painting, or major repairs are forbidden.
11. Motorized vehicles are not permitted inside the compound. Exceptions are at the discretion of the Facilities manager at which time a safety signal person must be employed.

Summer Users: (Facilities manager)

- a) **Maximum boat length is 20 ft. and 750lb displacement.** (Exceptions subject to annual approval by the compound committee)
- b) All boats must be registered with the facilities manager and occupy only their assigned space. Unregistered boats may be moved to the North compound at owner's risk.
- c) Masts should be upright or placed in mast racks. They must not be allowed to overhang the boat. Install safety flags to warn others if a temporary overhang does exist.
- d) Each fall, boats **MUST** be removed or relocated to the central portion of the compound 2 weeks prior to lift-out.
- e) Each spring, boats **MUST** not arrive or alternately, must be positioned to the central portion of the compound during the 2-week period following lift in, to enable access to mast storage racks.
- f) All personal items **MUST** be removed from the compound prior to lift out. Anything left behind may be disposed of during the following week by the facilities manager.
- g) Space is allotted for one boat on either dolly or highway trailer. Storage of empty trailers is not permitted.
